## PHOTOGRAPHY

### SYMPHONY OF COLORS

“An Exhibit of Photographic Images of Nature”

**Kress Memorial Church – January 13-14**

Kami Borhon has been photographing for seventeen years, and has studied photography in Sydney, Australia, Washington, DC and Winter Park, FL. In addition to photography, he is passionate about writing and painting. He loves the nature, and has developed a special connection with Florida where he moved about two years ago. His passion and talent are interwoven to compose images which dance with nature's melody.

“Photography is not just an art for me; part of my life has been formed by it. My relationship with nature reflects in the images which are selectively composed to celebrate the rhythm of life on our planet.”
